Subject: Fw: SCDM Values for Tetrahydrothiophene 1,1-dioxide (Sulfolane)

Hey Bob, can R10 make a request to have a SCDM value generated for Tetrahydrothiophene 1,1-dioxide (Sulfolane)? - this compound is critical to an upcoming PA we will be conducting. Also, if there is a standardized process for making these requests, can you let me know. Thanks, Ken

Subject: SCDM Values for Tetrahydrothiophene 1,1-dioxide (Sulfolane)

Hi Ken

We have a PA Petition coming in to conduct site assessment on a ground water plume in North Pole, AK. The compound of concern is Tetrahydrothiophene 1,1-dioxide, CAS #126-33-0. I didn't see this compound in SCDM, so I was wondering if HQ would be able to develop values for it. I can't remember the process for getting this done.

Thanks

Brandon Perkins
